

FOLDING IT INTO THE CURRICULUM: ORIGAMI & STEAM IN THE K-12 CLASSROOM

Tuesday, January 31, 2023
5:30 pm - 8:30pm ET (ONLINE)

5:30pm - 6:30pm Streaming Videos
(asynchronous options available)
6:30pm - 8:30pm Origami in the Classroom

Through hands-on activities, films, lectures and discussions, learn how origami illuminates new and exciting directions in the classroom from social-emotional learning to cross-curricular teaching. Come learn about the modern applications of paper-folding, a journey that takes us around the globe and to the stars and back! In this workshop, we will explore the “art of the fold” by investigating the multi-disciplinary aspects of origami in the classroom. While folding math and science into the curriculum, we will also consider the history of origami and paper-making in East Asia, paper-folding in Japan, and functional origami in modern scientific design.
