

THK Manufacturing of America, Inc./East Asian Studies Center present:

THK Manufacturing of America, Inc. Career Day

Wednesday, October 11, 2017

3-6pm

Come learn about Japanese companies by spending the afternoon at THK Manufacturing of America, Inc.

What does THK do?

THK's creative ideas and unique technology made the company worldwide pioneers in the development of the Linear Motion (LM) Guide mechanism. Today, LM Guides are an indispensable component of mechanical and electronic systems in a wide variety of industries. THK has also developed many other unique mechanical components, including the Ball Spline, Ball Screws and Link Balls, which are sold to customers worldwide.

Why the name THK?

"THK" stands for " Toughness," " High Quality," and " Know-how." THK aims to contribute to the improvement of society and development of industry by focusing on these three principles in its technology development and product manufacturing processes.

Schedule (October 11, 2017, 3-6pm):
